Work Experience

Canary Islands Technical Institute
2 months (2022)

In this research institute in the Canary Islands during my internship I was in charge of administering the computer systems with Windows Server and solving the daily incidents that occurred.

The Singular Factory
2 months (2024)

During my experience in this software development company I had the role of developing a website with HTML, CSS and JavaScript with a team of three colleagues that consisted of an eSports portal focused on video game competitions between companies.
